

Resident Log: C/L Psychiatry

MK2. Psychopathology ¹					
Includes knowledge of diagnostic criteria, epidemiology, pathophysiology, course of illness, co-morbidities, and differential diagnosis of psychiatric disorders, including substance use disorders and presentation of psychiatric disorders across the life cycle and in diverse patient populations (e.g., different cultures, families, genders, sexual orientation, ethnicity, etc.)					
A: Knowledge to identify and treat psychiatric conditions					
B: Knowledge to assess risk and determine level of care					
C: Knowledge at the interface of psychiatry and the rest of medicine					
Has not Achieved	Level 1	Level 2	Level 3	Level 4	Level 5
	<p>1.1/A Identifies the major psychiatric diagnostic system (DSM)</p> <p>1.2/B Lists major risk and protective factors for danger to self and others</p> <p>1.3/C Gives examples of interactions between medical and psychiatric symptoms and disorders</p>	<p>2.1/A Demonstrates sufficient knowledge to identify and treat common psychiatric conditions in adults in inpatient and emergency settings (e.g., depression, mania, acute psychosis)</p> <p>2.2/B Demonstrates knowledge of, and ability to weigh risks and protective factors for, danger to self and/or others in emergency and inpatient settings</p> <p>2.3/C Shows sufficient knowledge to perform an initial medical and neurological evaluation in psychiatric inpatients</p> <p>2.4/C Demonstrates sufficient knowledge to identify common medical conditions (e.g., hypothyroidism,</p>	<p>3.1/A Demonstrates sufficient knowledge to identify and treat most psychiatric conditions throughout the life cycle and in a variety of settings²</p> <p>3.2/B Displays knowledge of, and the ability to weigh, risk and protective factors for, danger to self and/or others across the life cycle, as well as the ability to determine the need for acute psychiatric hospitalization</p> <p>3.3/C Shows sufficient knowledge to identify and treat common psychiatric manifestations of medical illness (e.g., delirium, depression, steroid-induced syndromes)</p> <p>3.4/C Demonstrates sufficient knowledge to include relevant medical</p>	<p>4.1/A Demonstrates sufficient knowledge to identify and treat atypical and complex psychiatric conditions throughout the life cycle and in a range of settings (inpatient, outpatient, emergency, consultation liaison)³</p> <p>4.2/B Displays knowledge sufficient to determine the appropriate level of care for patients expressing, or who may represent, danger to self and/or others, across the life cycle and in a full range of treatment settings</p> <p>4.3/C Shows knowledge sufficient to identify and treat a wide range of psychiatric conditions in patients with medical disorders</p> <p>4.4/C Demonstrates sufficient knowledge to systematically screen for, evaluate, and diagnose</p>	<p>5.1/B Displays knowledge sufficient to teach assessment of risks and the appropriate level of care for patients who may represent a danger to self and/or others</p> <p>5.2/C Shows sufficient knowledge to identify and treat uncommon psychiatric conditions in patients with medical disorders</p> <p>5.3/C Demonstrates sufficient knowledge to detect and ensure appropriate treatment of</p>
		hyperlipidemia, diabetes) in psychiatric patients	and neurological conditions in the differential diagnoses of psychiatric patients	common medical conditions in psychiatric patients, and to ensure appropriate further evaluation and treatment of these conditions in collaboration with other medical providers	uncommon medical conditions in patients with psychiatric disorders

Comments:					
Footnotes:					
¹ This milestone focuses on knowledge needed for patient care. Thus, knowledge of psychopathology can be assessed through multiple choice knowledge examinations (e.g., the Psychiatry Resident In-Training Examination (PRITE)), and/or through evaluations of the application of knowledge of psychopathology to patient care, such as standardized patients or case vignettes, clinical skills evaluations, and knowledge evidenced during clinical rotations and the routine, supervised care of patients during residency.					
² This level includes identification and treatment of a wider array of conditions, across the life cycle (including childhood, adolescent, adult, and geriatric conditions), and in a variety of settings (e.g., outpatient, consultation liaison, subspecialty settings).					
³ Atypical and "complex" psychiatric conditions refer to unusual presentations of common disorders, co-occurring disorders in patients with multiple co-morbid conditions, and diagnostically challenging clinical presentations.					

Resident Log: Proficiency in Psychopathology, Psychiatric Formulation, Differential Diagnosis, and Treatment Planning	
Condition	Attending Initials
Delirium	
Dementia with Behavioral Disturbance	
HPI: Suicide Attempt	
Suicidal/Homicidal Ideation (Safety Assessment)	
Psychosis (not in the context of Delirium)	
Mood Disorder	
Anxiety Disorder	
Functional Neurologic Syndrome	
Decision-Making Capacity Assessment
